

**FOR IMMEDIATE RELEASE****PSAV and Eleven Wireless Partner to Expand Business Center and Network Services to the Hospitality Market**

Long Beach, Calif., June 25, 2007 – PSAV® Presentation Services, the leading provider of audiovisual and event technology support to the group meetings and events industry, has launched a broad range of Business Center and High Speed Network Management Services through its partner, Eleven Wireless, a leader in on demand software and services for broadband networks.

“Our hotel partners continue to consolidate their event technology services with trusted partners such as PSAV who already have trained staff on-site servicing a significant percent of their guests” said PSAV President and CEO, Digby Davies. “To meet this demand, we significantly increased our own investments in training, network operations, and in computer rentals. Furthermore, we seized a unique opportunity to further improve our service by partnering with Eleven.”

The ElevenBC solution for business centers allows PSAV to offer guests a turnkey option for a Microsoft Windows or an Apple Mac OS X experience from a single computer. Guests can be more productive by accessing a safe, secure and easy-to-operate system that is proactively monitored centrally and supported locally by PSAV’s on-site staff.

“In addition, PSAV will look to Eleven to support our hotel partners’ internet services at locations where we do not have personnel on-site” said Davies. “What is important to us is that our hotel partners have a trusted solution for all tiers of their hotel brands. ElevenOS allows the powerful brand image, remote management, and necessary reporting modules that make it a great addition to the services we offer our hotels.”

“We are proud to partner with a company such as PSAV which provides superior, state-of-the-art event technology support to hotels in the United States and internationally,” said Andrew Yorra, Eleven’s Chief Operating Officer. “By using our combined resources, hotels will provide the best guest experience, be it in the meeting room, the public space, or the guest room.”

“One clear example of how we will work together is within the Sheraton brand, where PSAV is already a Sheraton preferred provider and Eleven was recently selected as a preferred technology provider for ‘Link @ Sheraton,’ an Internet lounge currently rolling out to Sheraton hotels worldwide, that creates an area in the lobby of each hotel with dedicated computers, printers and network connectivity for guests,” he said. “When operating together in this scenario, PSAV and Eleven Wireless provide the end-to-end technology solutions to create the ultimate guest-computing, Internet and business-services environment.”

**About PSAV® Presentation Services**

PSAV is the leading supplier of audiovisual and event technology to hotels, associations, producers and meeting planners worldwide. With over 700 luxury hotels, resorts and conference centers worldwide, PSAV is totally committed to making every live event an unforgettable experience. PSAV’s goal is to turn ordinary meetings into memorable experiences so the message lasts.

**About Eleven Wireless**

Eleven is a leader in on-demand software and technology services for hotel broadband networks. ElevenOS enables the central management of all aspects of guest broadband networks. ElevenBC allows hotels to deploy an elegant, all-in-one business center computer solution. The company’s software is used in many of the leading hotel properties throughout the United States and Latin America. Eleven is headquartered in Portland, Oregon.
